

Live Safely.....Stay closely:- 10 Important tips
For you only

----- Supriya Kumar Chakraborty

- Save up thinking about the future of your child. Do not incur unnecessary expenditures or waste. There is no certainty of getting assistance of big amount from friends or relatives at the time of unexpected emergency.
- Do not keep the switch on of light, fan, gas oven or A/C in house or office unnecessarily. Because the resources of the country are wasted for it, on the other hand your expenses also increase.
- Do not forget to chalk up program to visit suitable place of historical interest or entertainment with all members of family once at least in a year. By it children become interested in journey and they acquire knowledge.
- Do not discuss about money, increase in income in front of the children or keep valuable things here and there. Keep them under pressure always.
- Give priority to book only as gift in any festival or social function. Let every house be a mini- library.
- Do not forget to inquire about teachers of your school life. On special day send them gifts of choice.
- During adolescence discuss openly with them about change in their physical constitution. Become house Physician.
- Do not forget to take advice or suggestion of senior persons of the family at least once before taking final preparation to take any important decision.
- If you face any unexpected big problem, then take preparation and idea about the next step that you should take after talking frankly with honest police officer and experienced lawyer.
- Do not take medicine for minor problems if it is not serious or do not visit doctor. Take balanced diet for good health and self –consciousness is sufficient.
